

How to *sort waste!*

- Plastic packaging, e.g. cottage cheese container, ketchup bottle, yogurt drink bottle
- Biscuit packaging, candy and ice cream plastic wrappers
- Soft plastic packaging e.g. plastic bags, bread bags
- Plastic bottle caps
- Styrofoam in small quantities

- Wooden cutlery, ice cream sticks
- Paper towels and napkins
- Envelopes and sticky notes
- Soft plastic that is not packaging, e.g. plastic binders

- Milk and yogurt paper packaging (sort the lid as plastic)
- Disposable paper cups
- Paper bags
- Wrapping paper

- Printer paper
- Newspapers

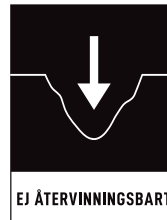

- Food scraps
- Fruit and vegetable scraps
- Leftover bread
- Tea bags
- In cases of very wet waste, place some newspaper or used paper towel at the bottom.

- Tin cans
- Foil packaging
- Aluminum foil
- Metal tubes, e.g. caviar (empty and with the cap on)
- Metal lids
- Bottle lids

- Non-depositable jars and bottles made of clear glass

- Porcelain, e.g. plates, cups
- Glass (not packaging), e.g. drinking glass
- Before sorting – first think about whether whole items can be reused in another location.

- Non-depositable jars and bottles made of coloured glass

- Batteries are hazardous waste and should be placed in designated containers or in the major recycling stations.
- NOTE! Lithium-ion batteries must not be placed in the recycling bin for batteries. Lithium-ion batteries should, as a first choice, be turned in to the IT Service Desk.

- Aluminum cans, PET bottles, glass, and plastic bottles that can be deposited

How should I *sort* this?
