

The digital transformation of retail

Handelns digitalisering

7.5 credits

7.5 högskolepoäng

Ladok Code: AE1HD3

Version: 3.0

Established by: Committee for Education in Business and Working Life 2020-06-11

Valid from: Spring 2021

Education Cycle: First cycle

Main Field of Study (Progressive Specialisation): Business Administration (G1F), Textile Management (G1F)

Disciplinary Domain: Social sciences

Prerequisites: The course Basic Marketing 7,5 credits (or equivalent).

Subject Area: Business Administration

Grading Scale: Seven-degree grading scale (A-F)

Content

The course aims to provide the student with basic knowledge about how the digital transformation affects the fashion and textile retail industry in specific and some other selected key industries. The course also includes a historical perspective on the development of retailing as well as ethical aspects of the digital transformation of retail. In addition, the course also aims to introduce students to the latest research nationally and internationally, focusing on the digital transformation of retail. The course will provide students with insight into and opportunity to problematise about what creates value for companies and customers, and how the interaction between technological development and societal changes affects the customer's purchasing behaviour as well as the company's business models and how the customer and digitalisation affect business models.

Learning Outcomes

After completing the course, the student will be able to:

Knowledge and understanding

- 1.1 Describe, discuss and reflect on different ways in which the digital transformation affects retailing and its format from an industry perspective,
- 1.2 Explain basic concepts, concepts, and models that are central to the digital transformation of retail,
- 1.3 Collect and present in writing an example of an empirical material,

Skills and Abilities

- 2.1 Identify and motivate key concepts, theories, and results that describe the digital transformation of retail,
- 2.2 Motivate the collection of a specific empirical material for analysis in relation to a problem formulation that is theoretically rooted in the course's literature,
- 2.3 Analyse and report conclusions regarding the digital transformation of retail on the basis of collected empirical material,

Evaluation ability and approach

- 3.1 formulate, reflect on, and discuss the effects of the digital transformation with the support of relevant theory formation and previous research,
